EDUCATION

ITM Skills University
B.Tech in Computer Science and Engineering (AI/ML)
• **Current Cumulative GPA:** 9.3 / 10.0
• **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Basic Operating Systems Concepts, Time & Space Complexity, Searching & Sorting Algorithms.

Kharghar, Navi Mumbai
Expected 2029

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), Python (Beginner), HTML5, CSS3
Frameworks & Tools: React.js, Vite, Tailwind CSS, Firebase, Git, GitHub, VS Code, Figma (Beginner)
Core Concepts: Arrays & Strings, Linked Lists, Searching & Sorting, Stack & Queue fundamentals, Responsive Web Design

TECHNICAL PROJECTS

Clean City Reporting Platform
• Engineered a citizen-led reporting platform allowing users to anonymously pin and report civic issues and garbage blackspots.
• Integrated **Firebase** for real-time unstructured data storage, secure user reporting authentication, and active image hosting.
• Designed a responsive, mobile-first interface optimized for rapid on-the-go reporting to elevate community engagement.

Personal Portfolio Website
• Developed a high-performance responsive professional portfolio to showcase academic milestones, skills, and code repositories.
• Implemented modular UI views, featuring fluid navigation tabs, a dynamic project exhibition matrix, and an interactive contact layout.
• Optimized frontend build pipelines using **Vite** to ensure sub-second rendering speeds and seamless production deployments.

DAMS Aerospace Website
• Architected a structural multi-page storefront layout for a conceptual aerospace services platform.
• Applied advanced semantic HTML structures combined with pure CSS layout parameters to ensure fluid cross-browser rendering.

LEADERSHIP & LEARNING TRACK

- **Self-Driven Engineering:** Currently modeling an interactive *EV Charging Station Finder* application to sharpen map API interfaces, alongside an *ATM Banking Simulator* designed to Master functional state logic.
- **Academic Track:** Consistently maintaining top-tier status in core computer engineering modules while concurrently self-studying modern engineering frameworks outside curriculum boundaries.

- **Engagement:** Collaborating with peer groups in developer forums, actively prepping to contribute to upcoming college hackathons and local technical club initiatives.
